Rowland Unified School District  
Nogales High School  
Scope of work for fence replacement

**CHAIN LINK FENCE CRITERIA**
Replace approx 925’ X 12’ existing chain link fencing with 8 gauge black vinyl coated chain link fence with 1” mesh openings.

Replace approx 50’ X 6’ chain link fencing with 8 gauge black vinyl coated chain link fence with 1” mesh openings.

Replace all top and middle rails, to be vinyl coated black. Install new bottom rail on all fencing, to be vinyl coated black.

Remove and replace 5 existing gates with 5 new gates. Please reference gate diagram

Remove and reinstall existing windscreen after chain link fencing installation. (windscreen to be stored at site)

**SCOPE OF WORK/SPECIFICATIONS**
1) Remove and dispose of existing chain link fencing approx 975 linear ft.
2) Chain link on new gates to be 8 gauge black vinyl coated with 1” mesh openings. Replace all gate frames. All gate frames shall be constructed with 1 ¾” diameter, schedule 80, galvanized steel pipe (minimum) and vinyl coated black. Corners and end-posts shall be box-braced.
3) Replace all hardware, gate hinges, brace bands, tension bands, tension bars, rail ends, eye tops, etc. All to be vinyl coated black.
4) Clean, primer and paint all posts with the materials listed on the spec sheet included.
5) Chain link wire will be an 11 gauge core coated with black vinyl creating an 8 gauge finish on the 975’ with 1” mesh

Contractor is to provide porta-potty and wash station facilities and trash receptacle(s) for his/her employees for the duration of the project. Trash receptacle is to be emptied daily and toilet(s) & wash station(s) maintained as
specified by the toilet vendor. Location of the above items is to be approved by a District Representative.

Contractor’s staging area/material lay-down area is to be designated by a District Representative.
Public sidewalks shall be kept clear of debris and open for public pedestrian use at all times. At no time shall pedestrians be forced onto the street for passage. At the end of each work day the Contractor shall clean the affected area and “safe-off” any open holes and/or trenches so as not to pose a safety hazard to students, staff or the general public.
All Contractor employees are not to communicate with students and staff and shall direct all questions from the public and/or Press to the District Office.
All Contractor employees assigned to physically work at the school site, shall have been ‘Live-Scanned’ and “cleared” by U.S. D.O.J. prior to the start of project.
Prior to submitting the final pay application for this project, the contractor shall request that the District conduct a “punch-walk’. All items indicated on punch-list (if any) shall be addressed and signed-off by District Representative prior to the acceptance of the final pay application.

All work to be completed according to standard practices. Any alterations or deviations from the above specifications incurring extra cost must be provided in writing to Rowland Unified School District Purchasing Department.
All work to be completed within 30 calendar days from the day from Notice to proceed.

See attached installation diagram for gate # and size of gates

All work to be completed according to standard practices. Any alterations or deviations from the above specifications incurring extra cost must be provided in writing to Rowland Unified School District Purchasing Department.
All work to be completed within 30 calendar days from the day from Notice to proceed.
ABOUT PRE-PAINT CLEANER / TSP SUBSTITUTE

Cleans and deglosses surface so paint adheres better. Use on oil and polyurethane, as a wall preparation prior to wallpaper, smoke, mildew, food stains, heel marks, crayon, old wallpaper, unpainted wood, metal, or vinyl wallpaper. Do not use on por

Removes:

✔ Dirt
✔ Nicotine
✔ Heel Marks
✔ Grease
✔ Mildew
✔ Crayon
✔ Grime
✔ Food Stains
✔ Old Wax

Features:

- Prepares surfaces prior to painting
- Improves paint adhesion
- No unpleasant odour
- No-rinse formula

DESCRIPTION AND USES

Krud Kutter® Pre-Paint Cleaner TSP Substitute cleans and de-glosses surfaces prior to painting. It is a ready-to-use, spray on–wipe off formula that cleans and de-glosses surface so paint adheres better.

Use on all paints, varnish, lacquer, and polyurethane, or as a wall preparation prior to wallpapering. Removes dirt, grease, grime, smoke, mildew, food stains, heel marks, crayon, old wallpaper paste, and wax from painted or unpainted wood, metal or vinyl wallpaper. Do not use on porous or non-washable wallpaper.

MAY BE PAINTED OVER ANYTIME AFTER 10 MINUTES!

FEATURES

- Water-based
- Biodegradable
- Non-Toxic
- Non-flammable

ENDURA-COAT®
Interior/Exterior Semi-Gloss
Industrial Maintenance Coating
ENCT60

DESCRIPTION
ENDURA-COAT® is a high performance, interior/exterior, low
VOC, direct to metal, water-based acrylic Industrial Maintenance
Coating with excellent adhesion and corrosion resistance. It can
be used on properly prepared primed wood, masonry, plaster
or drywall. ENDURA-COAT can be used as a direct-to-metal
coating on properly cleaned and prepared metal substrates.
For maximum protection, use of a substrate specific primer is
always recommended.

For Professional Use Only. Not for residential use.
(See SPECIAL INSTRUCTIONS re: Within SCAQMD.)

PRODUCT DATA
SOLVENT TYPE: Waterborne
FINISH: Semi-Gloss: 40-50% on a 60° meter
RESIN TYPE: Acrylic
COLORS: Stock Colors: Black, Safety Red, Safety Yellow. Other
colors can be special ordered or store mixed.
TINT BASES: L Tintable White, M Medium, U Ultra Deep
VISCOSITY@77°F/25°C (ASTM D 562): 94-100 KU

MAXIMUM VOC CONTENT: 100 g/L
MAXIMUM RAVOC (Reactivity-Adjusted VOC): 56 g/L

SOLIDS BY VOLUME (ASTM D 2697): 40.5% ± 2%
SOLIDS BY WEIGHT: 53.8% ± 2%
WEIGHT PER GALLON (ASTM D 1475): 10.82 lbs.

COMPOSITION BY WEIGHT
Pigment=25.9%  Vehicle=74.1%
Reinforcing pigments .................. 0.9
Water & additives ........... 50.0

*Prime pigments include titanium dioxide (TiO2), plus all other pigments directly
adding to the hiding power of this paint.

RECOMMENDED FILM THICKNESS PER COAT
Wet: 3.7 mils  Dry: 1.5 mils

PRACTICAL COVERAGE PER COAT AT RECOMMENDED DRY FILM
THICKNESS: Approximately 375-425 sq. ft. per gallon, depending on surface
conditions and application techniques.

THINNING RECOMMENDATION: This coating is intended to be
applied without thinning or diluting under normal environmental
and application conditions. If necessary, to maintain good
workability, add up to 1/4 pint (4 fl. oz.) of clean water per gallon
of coating.

AVERAGE DRY TIME@77°F/25°C (ASTM D 1640)
To touch: 1-2 hours  Recoat: 2-4 hours
Dry times and recoat times are temperature, humidity and film
thickness dependent.

PACKAGING: One gallon containers

STORAGE: Store in a dry area. Protect from freezing. Protect
from temperatures above 110°F for extended periods of time.
Extreme temperatures may cause paint to become unusable. See

CLEANUP: Warm, soapy water

DISPOSAL: For information on local options to dispose of
unwanted leftover paint, call Dunn-Edwards Customer Service at
1-888-DEPAINT or visit www.dunnedwards.com. Do not mix with
other products.

SAFETY DATA SHEET: Available at dunnedwards.com

APPLICATION
TEMPERATURE: 50°F minimum, 90°F maximum (air, surface
and material). Surface temperature must be at least 5°F above
dew point.

RELATIVE HUMIDITY: 85% maximum

AIRLESS SPRAY
PRESSURE: 1800-2500psi
TIP: .013"-.017"

BRUSH
Polyester/Nylon

ROLLER
1/4"-3/8" nap

CONFORMS TO

    - SUPER-LOC® Premium (SLPR00)
ULTRASHIELD®
Interior/Exterior
Galvanized Metal Primer
ULGM00-WH

DESCRIPTION: ULTRASHIELD® Galvanized Metal Primer is a premium, high performance, ultra-low VOC, low odor, single component, interior/exterior non-ferrous and interior ferrous metal primer. It provides excellent adhesion to properly prepared and etched galvanized metal and other non-ferrous metals: aluminum, brass, and copper. It is formulated to provide excellent application properties and very good hide. FOR METAL SUBSTRATES ONLY.

SOLVENT TYPE: Waterborne
RESIN TYPE: Acrylic Copolymer

FINISH (ASTM D 523): 7-12% on a 60° meter

COLORS: White. ULTRASHIELD Galvanized Metal Primer may be tinted with up to 2 fl. oz. of Dunn-Edwards ZTC Zero VOC colorant per gallon.

TINT BASES: White

VISCOSITY@77°F/25°C (ASTM D 562): 95-105 KU

MAXIMUM VOC CONTENT: 20 g/L (as supplied)
MAXIMUM RAVOC (Reactivity-Adjusted VOC): 9.6 g/L

SOLIDS BY VOLUME (ASTM D 2979): 41.6%
SOLIDS BY WEIGHT: 45.1%

WEIGHT PER GALLON (ASTM D 1475): 10.57 lbs.

COMPOSITION BY WEIGHT

Vehicle: 70.8%
Acrylic resins: 22.7
Water: 6.5
Reinforcing pigments: 10.3
Acrylic resins: 22.7
Water & additives: 48.1
Prime pigments: titanate dioxide (TIO2), plus all other pigments directly adding to the hiding power of this paint.

RECOMMENDED FILM THICKNESS PER COAT

Wet: 4.8 mils
Dry: 2.0 mils

PRACTICAL COVERAGE PER COAT AT RECOMMENDED DRY FILM THICKNESS

Approximately 250-275 sq. ft. per gallon, depending on surface conditions and application techniques.

THINNING RECOMMENDATION: This coating is intended to be applied without thinning or diluting under normal environmental and application conditions. If necessary, to maintain good workability, add up to 1/4 pint (4 fl. oz.) of clean water per gallon of coating.

AVERAGE DRY TIME@77°F/25°C (ASTM D 1640)
To touch: 30-60 minutes
Recoat: 2-4 hours
Dry times and recoat times are temperature, humidity and film thickness dependent.

APPLICATION EQUIPMENT: Brush, roller, airless spray.

PACKAGING: Quart, one-gallon, five-gallon containers

STORAGE: Store in a dry area. Protect from freezing. Protect from temperatures above 110°F for extended periods of time. Extreme temperatures may cause paint to become unusable. See Paint Storage Best Practices Technical Bulletin at dunnedwards.com for more information.

CLEANUP: Warm, soapy water

DISPOSAL: For information on local options to dispose of unwanted leftover paint, call Dunn-Edwards Customer Service at (888) DE PAINT or visit www.dunnedwards.com. Do not mix with other products.

CONFORMS TO: ARB 2007 SCM & CALGreen 2013; LEED 2009 IEQ Credit 4.2

SAFETY DATA SHEET: Available at www.dunnedwards.com

SURFACE PREPARATION: All surfaces must be cured, clean, dry, and free from dirt, dust, rust stains, grease, oil, mildew, wax, efflorescence, bond-breakers, and other contaminants. Remove all loose, peeling, or chalky paint by sanding, scraping, or other appropriate methods. Repair all cracks, holes, and other surface imperfections with a suitable patching material. Repaired surfaces should then be sanded smooth and dusted clean. Glossy surfaces should be dulled to provide a roughened surface for good adhesion.

SPECIAL INSTRUCTIONS

• CAUTION: Scrapping or sanding surfaces of older buildings (especially pre-1975) may release dust containing lead or asbestos. EXPOSURE TO LEAD OR ASPEROSITS CAN BE VERY HAZARDOUS TO YOUR HEALTH. Always wear appropriate personal protective equipment during surface preparation, and finish cleanup of any residues by water-washing all surfaces. For more information, see Dunn-Edwards brochure on "Surface Preparation Safety" or call EPA's National Lead Information Hotline at 1-800-424-LEAD, or log onto www.epa.gov/lead or/asbestos, or contact your state or local Health Department.

• This product can neither cause nor prevent or cure the growth of mold, mildew, or other forms of fungus. Excessive moisture and inadequate ventilation are the main conditions that promote their growth. Correct any such conditions before painting.

• Due to the various types of surfaces, always test a few different areas for adhesion.

• Galvanized metal must be cleaned with a solvent or a water-soluble degreasing cleaner to remove all oils prior to etching. Change wiping material and cleaning solution frequently so the oils are removed from the surface, not just spread around. Surface should then be etched with Supreme Chemical Metal Clean & Etch (SC-MED1-1).

• ULTRASHIELD Galvanized Metal Primer must be recoated within 7 days to ensure proper adhesion of the finish coat.

• Do not apply when the air or surface temperature is below 50°F. Avoid using if rain or snow is expected within 2-3 hours, as in colder temperatures, it may require longer time before the paint film dries enough not to be affected by rain or snow.
